Profile

I'm a passionate Frontend Engineer building high-performance web applications. With a strong focus on ReactJS, VueJS, JavaScript, ES6, NodeJS and TypeScript, I specialize in creating seamless user experiences., and testing. I love building products people love.
I care about customer satisfaction, teamwork, code quality

Skills

React	Typescript
Tailwind Css	NextJs
Jest	Docker
Styled component	Redux
Git version control	NodeJs
VueJs	

Professional Experience

Software Engineer, *Vula* ⬈   10/2024 – present

- Improved platform stability by refactoring buggy code and enhancing data validation processes, which boost stability over 20%.

- Revamped the company funding-inbox to increase visibility of funding opportunities for SMEs.

- Contributed to AI-driven features that connect lenders with small businesses across Africa.

- Introduced Playwright testing to improve reliability and support scalable development.

Frontend Engineer, *Nicelyformed* ⬈   09/2023 – present
Remote, London

- Led the user interface development with Next.js, integrating key product features and customer feedback, which resulted in a 25% increase in customer loyalty.

- Integrated Git-based CI/CD processes to automate builds and streamline deployments.

- Actively wrote UI and functional test using Playwright and Jest respectively which help ensure code quality and cut down bugs up to 25%.

- Collaborated with team to update backend code, implemented APIs using Node.js and Express, resulting in a 20% improvement in product shipping.

- Created high-quality diagrams and technical documentation using LaTeX and TikZ, improving clarity in product specifications and reports.

Frontend Engineer, *Clamp* ⧉   01/2023 – 06/2023
                                                                                      Remote

- Actively updated components variant story, using storybook to measure component's quality and compatibility

- Develop product from UI design to quality code using NextJs, storybook and antd.

- Used LaTeX and TikZ to create clear, visual documentation of frontend architecture, enhancing team communication.

- Integrated API, and handled automated testing to deliver quality and robust functionality

- Created easy to comprehend frontend documentation, from component functionality to screen flow ensuring seamless collaboration and understanding.

Frontend Developer, *Biggorillaaps* ⧉   07/2021 – 01/2023
                                                                               Remote, London

- Created an internal data analytics web application providing statistical insights, contributing to a 15% improvement in business decision-making.

- Spearheaded the development of a Fintech product using ReactJS and TypeScript, improving load times and user engagement.

- Oversaw the integration of backend APIs, implemented user authentication, and managed CRUD operations. Executed comprehensive user testing to ensure a seamless user experience.

- Assisted in A/B testing of components that resulted in a 15% increase in conversion rate
